

## **SMOOTH HEAVYWEIGHT MATTE PAPER**

### **IGSHMP (200gsm)**

ILFORD GALERIE Smooth Heavyweight Matte Paper is a double-sided smooth matte paper designed for printing high quality documents on today's range of photo-dedicated dye and pigment desktop printers.

#### **FEATURES**

- True double-sided inkjet media
- Ideal for fine art, high end brochures and presentations
- Smooth matte surface
- Fast drying

#### **PRINTER & INK COMPATIBILITY**

Compatible with all good quality pigment and dye desktop inkjet printers and the corresponding vendor's inks.

#### **AVAILABILITY**

ILFORD GALERIE Smooth Heavyweight Matte Paper is available in sheets in most international standard sizes. For detailed information please see the Availability Chart on the GALERIE section of [www.ilford.com](http://www.ilford.com).

#### **PHYSICAL PROPERTIES (TARGET VALUES)**

Weight	200gsm	
Opacity	>90%	
Caliper	240micron (10mil)	
Tint (Lab), front & reverse	95.0, 3.8, -7.5	
Brightness, front & reverse	>95%	(ISO 2470)

#### **HANDLING**

When loading media in the printer, be sure to flex and fan the paper to reduce the risk of misfeeding; in case of difficulty, single sheet feeding is recommended.

When printing double-sided, additional time may be required between printing the two sides to allow the media to absorb the ink and to dry.

Some printers may be equipped with automatic two side printing adapters: whilst the media has been successfully tested with these devices, depending on the printer and images it may be preferable to manually reintroduce the paper to print the second side.

#### **NOTE**

The life expectancy of all inkjet media is influenced by humidity, light and the ink being used. At higher light levels or humidity, one should expect a shorter life expectancy than at low light level or humidity. Some inkjet printer inks also offer poor stability when compared with others.

When storing and handling prints at the extremes of the environmental range (<10 % r.h. and > 70 %), performance and permanence may be reduced.
